Ivonne Benites Rodriguez

Software Engineering · Penetration Testing · Web Application Security · MSc Cybersecurity

Berlin, Germany · ivonnebenites2015@gmail.com · linkedin.com/in/ivonnebenites
Portfolio: https://ivonnebenitesrodriguez.github.io/my_portfolio_2026/

Skills

Development: Ruby on Rails, JavaScript, Python, TDD (RSpec, Jest)

Penetration Testing: vulnerability assessments, Nmap, Hydra

Application Security: OWASP Top 10, OWASP SAMM (fundamentals)

Code Analysis: Brakeman (SAST)

Threat Modeling: STRIDE, PASTA, OWASP Threat Dragon

Supply Chain: SBOM and VEX concepts

GRC: GDPR, PCI DSS, risk assessment

Certificate

TryHackMe — Jr. Penetration Tester Path (ID: THM-FZWGXDOGFJ)

OWASP

SBOM VEX Taint Analysis Project — Reviewer/Contributor

Global AppSec EU 2026, Vienna — Volunteer

Profile

MSc in Cybersecurity (Merit, Distinction in Thesis) with a background in full-stack software engineering (Ruby on Rails, JavaScript, Python), moving into security consulting. Hands-on foundation in vulnerability assessments and penetration testing fundamentals (TryHackMe, Nmap, Hydra), threat modeling (STRIDE, PASTA) and a technical security analysis during an internship at TREAGE. My development background helps me identify vulnerabilities and understand their technical root causes. Strong analytical and communication skills from many years running my own business.

Projects

Happy Apple Online Store

- Rails 8.1 e-commerce application with full TDD coverage, BCrypt authentication and IDOR protection
- STRIDE threat modeling via OWASP Threat Dragon (11 mitigated / 7 open threats documented)
- Documented GDPR and PCI DSS compliance; zero Brakeman warnings (SAST)

Secure Registration & Web Security Platform

- Full-stack security application: Rails API backend (Railway) + HTML/CSS/JS frontend (GitHub Pages)
- Implemented BCrypt and Rack::Attack rate limiting; functionality mapped to the OWASP Top 10

Professional Background

Internship, Security Analyst

TREAGE (Healthcare Tech Startup, Berlin) | 2024

- Applied the PASTA threat modeling framework for risk-based threat analysis
- Conducted a security analysis for a healthcare tech product

Owner & Operator

Casa Yllika Student Residence, Peru | 2009 – present

- Remotely operate a student residence with international university partners
- Independently manage and secure the technical infrastructure: secure WordPress administration, OAuth, access management

Education

MSc Cybersecurity — Arden University, Berlin | 2026
Grade: Merit (Distinction in Thesis)
