Ivonne Benites Rodriguez

Junior Security Analyst | Application Security · GRC · AI Agents | MSc Cybersecurity

Berlin, Germany · ivonnebenites2015@gmail.com · linkedin.com/in/ivonnebenites

Portfolio: https://ivonnebenitesrodriguez.github.io/my_portfolio_2026/

Skills

Pentesting: vulnerability assessments, Nmap, Hydra, Burp Suite (TryHackMe module)

Threat Modeling & Risk: STRIDE, PASTA, OWASP Threat Dragon

Application Security: OWASP Top 10, OWASP SAMM (fundamentals), Brakeman (SAST)

GRC: GDPR and PCI DSS documentation, risk assessment

Supply Chain: SBOM and VEX concepts

Regulation: Cyber Resilience Act (fundamentals: Annex I, Annex III), IoT and embedded security

AI Agents & AI Security: own agents built with Claude Code (skills, tool permissions); prompt injection, least privilege

Other: Wireshark, Linux command line (basics), Ruby on Rails, JavaScript, PostgreSQL

Certificates

TryHackMe Jr. Penetration Tester Path, 20 May 2026 (ID: THM-FZWOXDOGFJ)

Microverse Full Stack Web Development, 18 Feb 2024

OWASP

SBOM VEX Taint Analysis Project, Reviewer/Contributor

Global AppSec EU 2026, Vienna, Volunteer

Languages

Spanish: native

English, German, Italian, French: C1

Profile

MSc in Cybersecurity (Merit, Distinction in Thesis) with hands-on security projects: vulnerability assessments, penetration testing fundamentals, threat modeling and an internship at TREAGE (healthcare tech, Berlin). I build my own AI agents with Claude Code, with security rules such as least privilege, and I write about the EU Cyber Resilience Act. Background in full-stack development.

Projects

AI Agents with Claude Code

- Built job-hunter-berlin, an agent with separate skills that searches job offers and tailors my CV and cover letters
- Security rules: least privilege, read-only access, isolated browser, my approval before any change

Happy Apple Online Store — Secure E-Commerce

- Rails 8.1 app with BCrypt authentication and IDOR protection
- STRIDE threat model in OWASP Threat Dragon (11 mitigated / 7 open threats)
- GDPR and PCI DSS documentation; zero Brakeman warnings

Experience

Internship, IT Department — TREAGE, Berlin

Healthcare tech startup | 09/2024 – 11/2024

- Created and presented a PASTA threat model for the healthcare product
- Built a landing page (HTML, CSS); taught myself React.js

Founder & Operator — Casa Yllika, Lima

Student residence | 2009 – present

- Run it remotely with international university partners; manage and secure its technical infrastructure, including OAuth

Articles

- "From Living in the Prompt Window to Building My Own Agent", Medium, Oct 2026: building an AI agent, prompt injection and least privilege
- "From Coffee Machines to the CRA: Why Chip Security Now Matters", Medium, Oct 2026: Cyber Resilience Act (Annex I, III) and chip security, with a PASTA threat model, SBOM and VEX
- OWASP AppSec Vienna and ReDI School workshop for children, LinkedIn

Education

MSc Cybersecurity, Arden University, Berlin, 2026, Merit (Distinction in Thesis)

BSc in Marketing, UPC, Lima
